

Developing a Positive Safety Culture in the Workplace

The presence of a positive H&S culture in the workplace is a critical component of a successful safety management program. Learn how to engage staff, gain buy-in from management and create a genuine safety culture powered by values not compliance with this interactive workshop. Included will be the chance to work on your own H & S culture plan implementation with consultation from the facilitator and delegates.

To do this we will examine the following:

- Introduction & Problem Statement
- Concepts & Theory
 - What is Safety Culture?
 - Safety Culture & Safety Climate
 - Defining a Positive Safety Culture
 - A few words about Safety Leadership
 - Attitudes, Behaviours and Culture
 - Motivation
 - Incentive Programs
- Measuring Safety Culture
 - Where are you currently?
 - Safety Culture Models
 - Safety Culture Indicators
 - Safety Culture Model: James Reason & Patrick Hudson
 - Safety Culture Assessments
 - Designing a Safety Culture / Perception Study
 - Getting Buy-in
- Just Culture

Target Audience:

The workshop will be of particular benefit to Safety and HR Professionals wanting to implement a positive safety culture in their workplace.

Duration:

2 days
